[source: Q: F# - strange type error I'm getting the error "Error FS0138: A unique overload for method 'Some' could not be found. Please specify types that can be unified". Can someone explain why this would happen, and how to fix it? The line that's throwing it is b.Some(1). module Main where type Foo = Foo of int type Bar = Bar of string type OfType = OfType of 'T let doThings (a:OfType) (b:OfType) = a.Some(1) || b.Some(2) let doThing (a:OfType) (b:OfType) = a.Some(1) || b.Some(2) doThing (OfType(0)) (OfType(1)) Thanks! A: As the error message says, you need to specify the type of the arguments when you're using the overloaded methods. To fix this, add : 'a and : 'b to each of the arguments: doThings (a:OfType) (b:OfType) = a.Some(1) || b.Some(2) doThing (a:OfType) (b:OfType) = a.Some(1) || b.Some(2) Deadline: August 25, 2018 Position Name: Economic Development Specialist Department: Department of Tourism Senior Level: Senior Location: Mexico Positions Number: 1 Qualifications: The qualified candidate must have a university degree, completed his/her professional and technical career, have worked for at least three (3) years in one or more of the tourism activities and have two (2) years of experience in the sector.
