Download TIFF To PDF SDK 30 from here: TIFF is a type of image file which stores pixel data for an entire image, whether it be a full-color photograph, black-and-white image, gray-scale, color, and so forth. TIFF image files contain a ton of information, and it can be a lot of data to process, particularly if the original image is large. TIFF files are often able to store more data than other image formats, such as JPEG, GIF, or PNG. By using TIFF to PDF SDK, you can easily generate PDF from TIFF image files. It is often the case that image files will be easier to work with if they are converted into a PDF format. This is particularly true for larger images that would be difficult to view if you were to open them directly in a PDF reader. Mgosoft TIFF To PDF SDK has been optimized to work with Mgosoft products, but it has been tested on all major platforms and can be used for general image conversions. TIFF to PDF SDK has a robust, easy-to-use interface, making it possible for anyone to use. Software built with this development kit can be distributed to your customers royalty-free.
