
TTS Voice Recorder License Key Download [Win/Mac]

TTS Voice Recorder Crack

1)Voice recorder is a simple tool that record voice from microphone for text to speech or voice to text, it is reliable, fast and easy to record voice. 2)Speech to text has become common application in our life: you can record the voice to text directly, or you can input the words by typing it in a text box on screen, and Speech to text will take your text and convert it to voice, just the same as the voice. 3)Record voice from the microphone, you can set it to stop automatically when the sound level reaches the specified threshold, or record the microphone continuously while you are talking, play the recorded voice when you stop talking. You can make the new recorded speech file as MP3, WAV, ACM, WMA, OGG and APE, and upload them to the server, and if you want, you can also save them in your computer's folder. 4)The sound recorder can be used as alarm, or as reminder: set the sound threshold by volume in dB when voice is too low or too high. TTS Voice Recorder Installation: Set your target sound card as default, then install this program, do not run the exe file after installation, just double click on the desktop. TTS Voice Recorder Features: 1)Speech to text is a very common application, you can record voice to text directly, or you can type the text in a text box on the screen and record the microphone, when you stop talking, it will play the recorded voice, or you can click on "Start recording" button to record the microphone continuously when you talk. 2)Voice Recorder has many features, like record single voice, multiple voices at the same time. You can record the voice on the system when the sound card is detected, stop recording when the sound is silent, make a new recording, open the recording to compare with the original recording. More importantly, you can set the recording to stop when the sound volume reaches the specified threshold, or record continuously. You can make the new recording as MP3, WAV, ACM, WMA, OGG and APE, and if you want, you can also save them on your computer. 3)Speech to text has been widely used in many applications, such as the reminder when you are talking on the phone, the alarm when you are sleeping, the voice recording of lectures or class, and the voice recording of the police station
