A 1-year-old female mongrel dog was euthanased for medical reasons, the main reason being the presence of a foreign body in the trachea. A partial-thickness defect in the tracheal mucosa was detected during autopsy and stained by a balloon-inflation test. The foreign body was found to be a 5-cm segment of nylon thread, which had been surgically introduced during treatment of a herniated intervertebral disc, 11 months previously. This report describes the pathomorphological characteristics of the malpositioned foreign body as observed during autopsy and discusses the possibility that the thread may have been aspirated during surgical treatment. Talking about the U.S. presidential election is like talking about the NFL without a referee. At least in a country where one of the two major parties is demonstrably racist, it's inevitable that one candidate will make things worse. Hillary Clinton's disavowal of her own husband's record of sexual misconduct, and Donald Trump's ongoing chants of "Lock her up," are just two of many examples of the gross bigotry on display in this year's race. Both have been nominees before, and both have exposed an ugly side of American politics. The bigger problem, however, is that the two parties have lost all sense of what makes for a decent society. Both have espoused some pretty awful ideas, and they are now wreaking havoc in our political culture. This application includes a minimalistic interface that only allows you to switch between the list of the songs, the display of the song and the video visualization. It is possible to add music to the list of favorite songs and to play them from the list. There is also a search function for the list of favorite songs. Click the envelope, save or remove files, and the add new file interface can be accessed from the toolbar. The interface is more or less the same as Windows Media Player 12. This means that you will not be able to play music or video on the Internet. I understand that Edge should not be the only browser on Windows 10, but I see the problems that this browser causes as a disadvantage. More... Until now, you could use
