Keymacro is a powerful text editor for the Windows platform. Keymacro is especially suitable for quickly creating and editing macros, for example for such purposes as editing frequently performed text operations in an orderly and quick manner. KEYMACRO is an extension for Notepad and MS Word which displays tabular text data in a very easy way. In a simple and straightforward manner, a series of rows and columns can be arranged, split, copied, moved and pasted. KEYMACRO is easy to learn and use. It supports basic to complex macros with an integrated help. KEYMACRO offers key editing functions such as searching, replacing and cut/paste. KEYMACRO does not require any additional software and doesn't need to be installed. It can be used at any time, from any location. Keymacro has an integrated help with up to 50 sample macro recipes, each of which can be used as a basis to develop your own macros. Keymacro was created by the program author David McNear, who is a seasoned programmer. Keymacro is not a replacement of Notepad or Word. Keymacro was initially designed to help and support a friend in his work. For this reason, it is much more flexible and powerful than other macros. Keymacro supports all major languages and for many more types of data. Support
