Overview of Outcome Battle

Outcome Battle (OB) is a cross-platform battle RPG where a battle between gods inspired by the story of Saint Seiya/Seirei no Kizuna (聖闘士星矢外伝 The Last Revenge of Seiya/ The Legend Reborn) begins in the story of Tarnished Empire, a new game in the series, developed by RPG Company / Mariana Tejima.

OB is an action RPG where you can create your own character, and enjoy an epic adventure centered on this amazing story.

OB can be played on PC, and its battles are made possible through a new in-game online Battle feature. An in-depth battle system with a blend of action and role playing game play mechanics. A game driven by strategy, as well as intuitive control and strategy.

OB can be experienced by connecting with your friends using a cross-platform battle system, you can not only share and fight together, but enjoy having a lively and interesting battle.

OB can also be played on the Android and iOS Platforms. Both types of platforms use Game Center, and System Link.

OB is a close connection of the company and a dedicated development team comprised of talented developers and artists. The quality created in this game series has been applauded and used as a reference in the development of this project. Also, the Aeon Tecnology Research Institute "Aeon" (Aeon Lab, Robotics, Engineering, Information Processing, Lifecycle Matters, Computational Science, Development and Support) is a totally different team from the company. This is an aspect I cannot talk about in detail for the time being.

OB features:
