Part 1: The Photoshop Elements 16 Skills Series Text and Text Styles Text and Type Let's start with one of the cooler features in Photoshop Elements: Text and Typography. We can use this feature to quickly make text fade out, turn a photo into a piece of typography, change the font, add some custom effects and much more. And don't worry, the text styles also have cool features like adding shadows to the text, adding reflections and filters to the text and much more. Let's go ahead and start working on some text. Create a New Document. Next to the New Document button, you will see the Text and Typography icon. Double-click this icon to open the Type panel. Add Text Click anywhere on the page. You will see a plus sign with a gray border. Click and drag the mouse until you see the area where you want to place your text. To add text,

click the text type tool and start to type the text. Once you have finished typing, hold down the Shift key and click to add a space between each letter of the text. Type As you can see, you can also type in characters, numbers and symbols in the text tool bar. If you want to change the color of your text, click the Text Color icon to edit the text color. To change the font of the text, double-click the text type tool and select a font from the options in the Font panel. Text Style A text style is a collection of properties for an entire text string. Click the text style icon to open the Text Style panel. You can click the 05a79cecff
