I am trying to read a list of numbers in a text file with a line length of 12 and in the same text file there are 30-40 numbers. As i understand it's a good practise not to use Console.WriteLine() or Console.WriteLine(). So what i am doing is, I am reading this list with string[] numbers = File.ReadLines(@"C:\Users\Administrator\Desktop\umbers.txt"); Then i am trying to output this list (that contains 30-40 numbers), using foreach (string number in numbers){ Console.WriteLine(number); } but i am getting the following error cannot convert string[] to System.IO.TextReader Can someone help me with this, is this a problem with Visual Studio 2015 or is this error something that I have done. A: You are trying to pass a string array as a parameter to the ReadLines method which expects a TextReader. The TextReader is a type which requires a parameter to create the TextReader. So you can just use the TextReader that's already created by Console. string[] numbers = File.ReadLines(@"C:\Users\Administrator\Desktop\umbers.txt"); foreach (string number in numbers){ Console.WriteLine(number); } Furthermore you should not try to convert the array 6d1f23a050
